

SECTION 2 - FEDERATION OF MALAYA.

CHAPTER SEVEN

1948 DEFINITIVE ISSUE – 1. THE STAMPS.

With the transition from military to civilian government, the need for a new series of stamps for Malaya became too urgent to wait for new designs to be developed. Instead, the Straits Settlements 1935 “Malaya Key Type” design showing two coconut palm trees was further adapted for the purpose. Given the number of plates that had to be made, it is not surprising that introduction of the new issue was phased in as printer production capacity became available and thus as stocks arrived, state-by-state. BMA stamps continued to be printed in parallel with the new issue until April 1949 for those states which had not yet received their new issues. During the overlap period, any colour or paper changes would be reflected in both series of stamps. After this date, these states had to rely on using up Crown Agents Stamp Bureau unsold stocks, for which two Requisitions were raised by Kuala Lumpur in July 1950.

Development of the Design:

The design was originally developed by De La Rue staff artists from essays made in 1935 by the Survey Department of the Federated Malay States. The design was adapted for the 1937 King George VI issue of Straits Settlements by substitution of King George’s portrait, taken from a photograph by Bertram Park (No. 05260K of 15 December 1936). For the post-war issues, it was further developed by substitution of state names and, where appropriate, emblems or heads of state portraits for “STRAITS SETTLEMENTS” and/or King George’s portrait, as necessary. The 21mm x 24mm designs also portray at each side a coconut palm on a sea shore. For the low values, printing colours continued the pre-war standard colours used since the 1920s, but high values were changed to avoid the use of coloured papers (see below for more detail).

This Malaya Key Type design evolved over the period of use. This development can be followed by study of the lower left corner and value tablet. I designate as Die 1 the design used for the original Straits Settlements two-plate (vignette and frame) printings. To cut costs, single working plates with a redrawn design were produced for high volume monochrome values and printings from these began in 1938. After the war, all monochrome values were to use single working plates. I designate this redrawn design as Die 2. Die 1 and Die II correspond to Die I and Die II in Stanley Gibbons catalogues.

The **Singapore** issue appeared first, on 1 September 1948. For the most part, this issue used the King George VI Die 1 frame for the bi-colour values and the Die 2 frame for the monochrome values, adapted by the substitution of “SINGAPORE” for “STRAITS / SETTLEMENTS” in the bottom centre tablet.

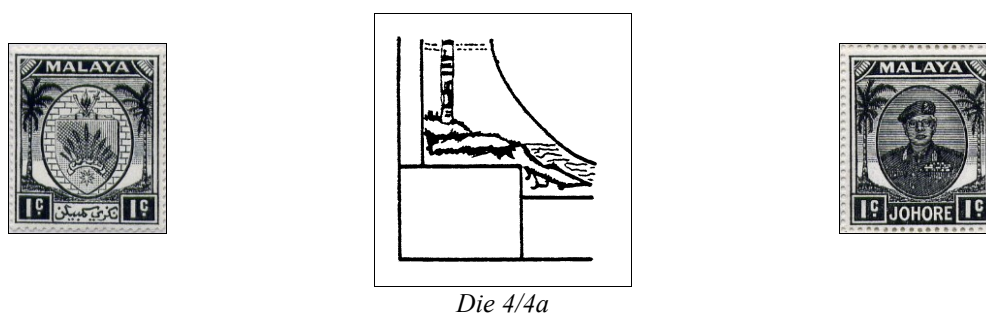

However, the Singapore 25c. used the Die 2 frame design on a bi-colour stamp. It is probable that the original intention was for this to be a monochrome value, so the plate was originally prepared as a single working plate. When it was decided to use two colours, rather than restart from scratch, it appears that the decision was taken to adapt the SWP by erasing the vignette. I designate this Die 3.

After the initial supplies were sent to Singapore, but before the original order was completed, the perforation changed (see below), the new perforation becoming the standard for all other issues in this series.

Die 3 error

Penang and **Malacca** issues appeared on 21 February 1949 and 1 March 1949 respectively. The Die 3 error was not carried over to these issues, a normal Die I 25c. being used.

For the Malay states issues, the design was redrawn with rectangular value tablets, instead of square, and a single thickness outer frame line instead of double thickness. There are no design differences between single plate (Die 4) and 2-colour plate (Die 4a) frames. The stamps for the Federation of **Negri Sembilan** were the first of this type to be issued, on 1 April 1949. They showed the state coat of arms with the state name in Jawi script in the bottom tablet. The nine spears on the coat of arms represent the nine states of Negri Sembilan.

The next issue to appear was that for **Johore**, issued on 2 May 1949 with the portrait of Sultan Sir Ibrahim and JOHORE in Roman capitals in the bottom tablet. This was the only version to use white-on-colour lettering for the bottom tablet; all the others being in colour on white.

Selangor followed on 12 September 1949, with the portrait of Sultan Hisamuddin Alam Shah and text in Jawi script. **Trengganu's** issue of 27 December 1949 was similar but with the portrait of Sultan Ismail, as was that of **Pahang**, issued 1 June 1950 with the portrait of Sultan Sir Abu Bakar.

Kedah's issue of 1 June 1950 established two new sub-types (4b single plate and 4c bi-colour) as the design was redrawn to accommodate both Roman and Arabic state name tablets, one above the other, totalling the height of the value tablets. This issue was the only one to feature two different designs. Values to 20c. bore the rice (padi) sheaf symbol used on the low value Kedah stamps since 1912. The 25c. and above values bore the portrait of Sultan Badli Shah.

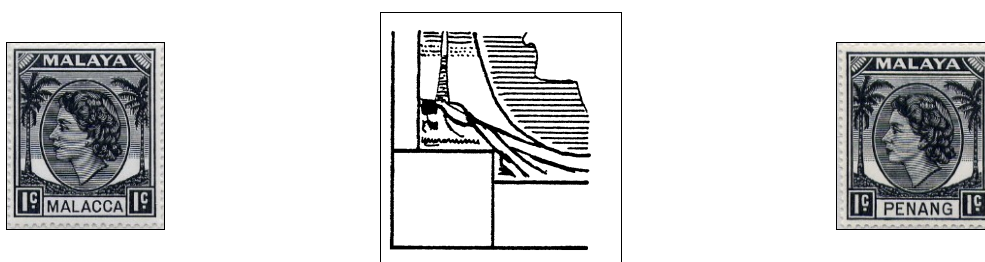

The **Perak** issue appeared on 17 August 1950 and reverted to the "standard" type with the portrait of Sultan Yussuf 'Izzuddin Shah and the state name in Jawi script. The late date of issue for Perak may be the result of the need to incorporate the portrait of the new Sultan, who had acceded to the throne in July 1948. It is possible that the first essays may have contained the portrait of Sultan Abdul Aziz.

Perlis had hitherto used Kedah stamps, but now received its own. Following Kedah's example, the stamps for Perlis, issued on 26 March 1951, required the design to be redrawn for bi-script inscriptions. However, instead of accepting the Kedah solution, the bottom tablet remained Jawi script only as on Die 4 and 4a. A small tablet containing the Roman text "PERLIS" was inserted at a late stage between the portrait of Raja Syed Putra and "MALAYA" at the top of the stamp, creating Dies 4d (single plate) and 4e (bi-colour). It is believed that Perlis used some of Kedah's 1948-series stamps prior to its own becoming available, in line with pre-war practice.

The last state to receive its new stamps, some two years after printing of BMA stamps ceased, was **Kelantan** on 11 July 1951. This used the standard Die 4/4a design with the portrait of Sultan Tengku Ibrahim and text in Jawi script. As BMA stamps were in short supply, Perak 3c., 4c., 20c., 25c., 40c., 50c. stamps were temporarily issued in Kelantan from 27 November 1950.¹ The 2c., 6c., and 15c. were later added.

In the absence of documentary evidence or a continuous and diverse pattern of usage over a defined period, stamps used outside their home state after 11 July 1951 cannot be readily attributed to out-of-state issue, as the stamps were valid for postage throughout the Federation and were frequently so used by travellers.

This was not, however, the end of the story. New postal rates were effective from 1 September 1952 and additional values or changed colours were issued for all states. Most match their State's earlier issues, the 20c. blue even continuing to use the two-part plates of the previous issue (Only Negri Sembilan used a new 20c. plate, but it did not change to a single working plate, possibly to avoid problems should the 20c. colour revert to black and green at some future date but most likely to save the cost of new plates). However, the new 5c, 12c and 35c values for Malacca, Penang and Singapore had the single thickness outer frame line of Dies 4 to 4e instead of the double thickness of Dies 1 to 3, whilst retaining square value tablets. I designate the single working plate Die 5 and bi-colour Die 6.

Dies 7/8

Queen Elizabeth II acceded to the British throne on 2 June 1952. Singapore was now diverging from the rest of Malaya and would soon have self-government and its own independent issues. It had been working on a pictorial issue for some time. QE2 issues in this series were therefore only produced for Malacca and Penang. The design was redrawn creating Dies 7 (single working plate) and 8 (bi-colour).

Finally, the last addition was a 30c for airmail from 4 September 1955. In all cases, the contemporary standard die for the respective state was used.

Essays and Proofs:

Water colour sketches of the proposed 25c. designs for the 1949 issues of Johore, Negri Sembilan, Selangor and Trengganu were produced by the Survey Department and enclosed in small folders bearing on the inside "Proposed (state) Stamp / Water Colour Sketch / Survey Department Malayan Union". Later, similar folders for the 1950 issue of Perak and the 1951 issue of Perlis were produced with the inscription "Proposed (state) Stamp / Water Colour Sketch / Survey Department / Federation of Malaya". It is assumed that similar folders existed for the other states and Singapore. It has been suggested² that these sketches were produced by De La Rue artists. The stamps in these folders were different in their means of production:

Johore:	Printed centre in light purple with lined background. Hand-painted frame in dark purple.
Negri Sembilan:	Centre in dark purple (probably a photographic reproduction of larger artwork). Hand-painted frame in dark purple.
Perak:	Photographic centre in light purple. Alternative centre to left of complete stamp. Surround of both heads lightened in white. Collar on head in stamp restyled in white. Hand-painted frame in dark purple, with Jawi text obliterated in white and restyled as issued. This folder has been annotated in red manuscript "Approved for amended portrait", initialled and dated 16/6/49 plus "& revised Jawi", same initials and 3/11/49.
Perlis:	Touched-up, photographic centre in light reddish purple with background lightened in pale purple and white. Hand-painted frame in dark purple. Differed from issued stamp in not having the "PERLIS" inscription. Heavy outer-frame line as on Dies 1-3.
Selangor:	Printed centre in light purple with lined background. Hand-painted frame in dark purple.
Trengganu:	Photographic centre in light purple with lined background. Hand-painted frame in dark purple.

Progressive die proofs of some values exist in the public domain, including a partially cleared Trengganu die proof in black.

Imperforate examples of the 10c. Johore and 8c. green of Kedah, Pahang and Trengganu printed on thin, roughish, buff (grey in the case of Johore) paper have come onto the market. This is unlikely to have been design proof material and is more likely to have been printer's waste on press test paper which has been removed illicitly from De La Rue's works. The Selangor \$5 duty plate printed in brown on the same paper is also known to exist. The only time when the known values were "in works" at roughly the same time was the summer of 1953 (May to September).

Printer:

They were printed in sheets of 100 (10 x 10) by De La Rue using letterpress (surface printing in DLR terminology).

Printing plates:

Printing plates were normally single working plates for single colour stamps, and separate border and vignette plates for dual-colour values. The same vignette plate was used for all values requiring the same portrait or coat of arms. New plates were made as necessary. Sheet markings are one (single working plate) or two (bi-plate) discontinuous jubilee lines, ornate T guide-marks (usually incompletely printed³) above and below the perforation line between columns 5 and 6, and the plate number. In the case of the single working plates, the plate number is normally found above R1/2 and below R10/9. In the case of the 8c. green Malacca, the number is uniquely found above R1/1 and in the normal position below R10/9. In the case of dual working plates, the vignette plate numbers appear above R1/1 and below R10/10, while the border plate numbers appear above R1/2 and below R10/9.⁴

It has been suggested⁵ that the use of Jawi script for state names caused a certain degree of confusion at the printers, just as it still does for inexperienced collectors. The plates for some states therefore received the state name in Roman text below column 2 (border plate only in the case of bi-colour issues). This is borne out by the absence of this from the first such issue (Negri Sembilan), but its emergence for the next (Selangor). The name appeared (in the border colour in the case of by-colour issues) initially in sans-serif capitals (Pahang, Selangor, Trengganu), but was changed for later issues to serif capitals (Kelantan, Perak). The new plates made in 1952-1955 (5c, 12c., 30c., 35c. and replacement plates) for all these states, including Negri Sembilan, received the state name in small sans-serif capitals under column 2 (under columns 1 to 3 in the case of Negri Sembilan!).

Colours:

Colours on this issue pose quite a challenge, as the various catalogue listings not only disagree on the colours used but also appear to have been compiled on an ad-hoc basis as new issues appeared without reference to previous descriptions. Colours vary not only from printing to printing, but also within a Requisition (e.g. Penang (KG6) 2c.). These colour changes can sometimes be associated with specific production periods but in other cases are clearly due to normal production variations in mixing, ink thickness, plate pressure, etc. There was, however, a tendency for the use of strong colours in early printings, with economy measures tending to cause lighter colours from 1951 onwards, and it

is noticeable that the issue for Perlis, which did not appear until 1951, predominantly comprises these lighter colours, as is seen when they are compared with earlier issues. Printing colours are nominally as follows, with variations studied on a basis of blind testing without reference to state or value:

1c. Black:

No significant variations recorded. The nearest match on the SG Colour key is actually “slate-black”, but it is not exact, so “black” will suffice.

2c. Orange:

This colour varies from a strong “orange” to “yellow-orange”, “orange-yellow” and a much paler “yellow”. The first two both appear within the single orders for Singapore (Perf. 14) and Penang with King George VI’s portrait, so are production variations, accounting for the bulk of the earliest issues, with yellow-orange becoming the norm by 1949. The colour drifted towards yellow from 1949 with the two shades “yellow-orange” and “orange-yellow” co-existing as production variations for the rest of the issue up to 1957, including in several printings where only one requisition was placed. The “yellow” appears only in the last printing when Johore was the only country using the issue. Given similar trends on other values, this suggests deliberate economy in use of colour pigment. The “yellow-orange” and “orange-yellow” shades also appear on the 25c.

3c. Green:

Early printings were “deep blue-green”, with minor variations in intensity in production. The last printings for Johore and Perak in September 1951 were quoted as yellow-green but correspond to SG colour “green”. This is the colour later used for the 8c. The Perlis 3c. exists in a “light green” shade

4c. Brown:

The basic colour is “red-brown”, used for the bulk of printings between 1949 and 1956. A darker “deep red brown” was used for the initial Singapore printing and appeared for some states through to 1954. This is probably a production variation. There are two significant excursions, darker shade tending to “chocolate” in Perak and lighter “chestnut” in late Johore (and a late Penang) printings.

5c. Magenta:

Introduced as a new value in 1952, this stamp uses an ink that fluoresces red under ultra-violet light. Four distinct shades have been identified. Most of the first printings of 1952 were the darker “deep magenta” shade, the majority of printings from 1953 onwards were recorded as the lighter “bright magenta” shade, which is highly fugitive. Later printings from 1956 appear on progressively lighter shades which I designate “pale bright magenta” and ultimately “pale magenta” for late Johore and Kedah printings. “Pale bright magenta” also appears as a production variation within the single Perlis printing and is known from various Selangor printings.

6c. Grey:

This appears to have been a difficult colour to print consistently. Descriptions as light grey, pale grey, grey, greenish-grey or deep greenish-grey appear in catalogues on a random basis throughout the period (even for contemporary batches). It may be significant that a sheet of the November 1950 printing of the Selangor 6c. was taken for unspecified colour tests. Dated mint copies seen tend to be lighter from 1951, but paper tone can affect the apparent ink colour significantly. Examination of plate number colour dabs show “greenish-slate” on early printings and selected later printings to 1956, “greenish-grey” for the bulk of production from 1950 to 1956 and lighter “bluish-grey” for late printings between 1952 and 1957.

8c. Red:

This short-lived value is normally SG colour “rosine”, which was also used for the 12c. However, Perlis was a lighter shade “bright rose-red”.

8c. Green:

Introduced as a colour change in 1952, this was a yellower and lighter shade than that initially used for the 3c., but matching the very last 3c. printings (and therefore listed below as “green”). The 1953 printings used the “deep blue-green” normally found on the 3c., but the last 1955 printing reverted to green.

10c. Purple:

A series of purples appear across the 10c., 25c., 30c., 35c., 40c. and \$1 stamps. Under the UV lamp, they immediately divide into fluorescent purples (which glow red) and non-fluorescent purples.

Fluorescent colours: The first fluorescent purple for the 10c. corresponds to SG colour “claret”. Darker “deep claret”, and slightly redder “pale claret” versions also appear. The most noticeable fluorescent variety is a Singapore 10c. aniline “magenta” which appears to be fugitive even in mint condition! For other values, the dominant fluorescent shade lies between SG colours “deep magenta”, “reddish-purple” and “deep reddish-purple”. As “deep magenta” has been used for a distinctly different 5c. shade, “reddish-purple” will be used for this colour.

Non-fluorescent colours: The basic non-fluorescent purple for the 10c. also corresponds to SG colour “deep claret”. Trengganu, Selangor and Kelantan 10c. use the “claret” shade, while “pale claret” appears on the Pahang \$1.

For other values, the dominant shade is close to the fluorescent “reddish purple”. Most 30c. stamps fall in this category, which would support the theory that the non-fluorescent inks were used during the later stages of production.

Sequence of use: As regards sequence of use, it appears from dated copies from Crown Agents releases that the fluorescent “claret” appeared first, together “deep claret” and “reddish purple” shades. The change to “deep claret” non-fluorescent ink took place in 1953 with “reddish-purple” and “claret” shades. Fluorescent ink reappeared briefly on the 30c. in 1956 (in error?).

12c. Red:

Introduced as a new value in 1952, this value took over the “rosine” colour of the 8c. However, three of the last states to be printed, Perlis, Kelantan and Johore, used the lighter “bright rose-red” shade, which was also used on the later 30c. The few reprints are believed to have reverted to “rosine”.

15c. Blue:

Describing the blues of this issue is quite a challenge as some nine distinct shades have been noted among the 15c., 20c. and 50c. values. However, all the plate number colour dabs closest approximate to “bright blue” on the SG Colour Key. It is therefore necessary to work from the apparent colour of the stamp itself.

For the majority of 15c. values, “bright blue” is the best description, but there are exceptions, such as the single Negri Sembilan printing, which is much darker, approximating to “ultramarine”, with a “deep blue” shade.

20c. Black and green:

This short-lived value has no clear variations. Colours are normally consistent with 1c. and “deep blue-green” 3c. printings, but Perlis, being late on the scene, used “green” as on the 8c.

20c. Blue:

Introduced as a colour change in 1952, the colour of the 20c. is normally a similar “bright blue” shade to that of the 15c., although the intensity varies. Late printings seen tend to be a fraction lighter than the original 1952 printings. Random occasional printings between 1954 and 1956 have been described in the past as deep blue or ultramarine, suggesting that these shades are due to production variation within printings. Those seen suggest that “pale bright blue” may be a better description.

25c. Purple and orange:

See 2c. and 10c. notes above, which generally apply to this value. Both yellow-orange and orange-yellow borders exist. Heads are reddish purple (darker version) or bright purple (redder version). Both shades appear with fluorescent ink (early printings) and non-fluorescent ink (from 1953).

30c. Red and purple:

A 30c. stamp was included in the first Singapore order but it was cancelled in favour of the 40c. stamp.

Introduced as a new value in 1955, this replaced the 35c. to pay airmail to a number of destinations. As with later printings of the 35c., the original colours were “bright rose-red” vignettes with non-fluorescent “reddish-purple” borders. Some 1956 releases were originally described as red-purple (as opposed to the contemporary brown-purple description used for the original printings), and several states exist with a fluorescent ink border that may be redder than the non-fluorescent. The reason for this reversion is not clear, but it is assumed to be an error.

35c. Red and purple:

Introduced as a new value in 1952, this replaced the 40c. to pay airmail to a number of destinations. The majority of printings are described as red-purple, consistent with the contemporary 10c., but late printings were “bright rose-red” and “reddish-purple” (non-fluorescent) as subsequently used for the 30c.

40c. Red and purple:

The 40c. has hitherto been described as brown-purple, which is out-of-step with the contemporary 10c., but this seems to reflect an initial colour difference between these values, which were later aligned. Early printings correspond to “rosine” vignette with fluorescent “deep claret” borders on the SG Colour Key, whereas the borders of later printings tend to “reddish purple” (still fluorescent).

50c. Black and blue:

The 50c. printings until 1951 are a much darker shade of blue than that used for the 15c., often described as “violet blue” but closest to SG Colour “ultramarine”. Some issues are “bright blue” as used on the 20c. From late 1951, the colour is usually described as “deep blue” and is dull by comparison. A later “blue” shade appears late for Johore.

\$1 Blue and purple:

The past descriptions of the \$1 printings are probably the least consistent of any value. The colours used were those of the 10c. and 15c./20c. (not 50c.) and stamps seen reflect the variations over time in those values. Some shades of purple are fugitive. Late printings, such as Malacca and Penang QE2 are non-fluorescent “reddish purple”.

\$2 Green and red:

The green used for the \$2 and \$5 is different to that used for the 3c./8c., and is best described as pale “emerald”. The red is “rosine”, as on the 8c. and 12c. stamps.

\$5 Green and brown:

The green is as \$2. The basic brown colour is “red-brown” which comes in two shades, the darker of which I will describe as “deep red brown”. This is probably a production variation.

Paper and watermark:

The chalk-surfaced paper gives no significant fluorescent reaction under ultra-violet light, this issue being before the widespread introduction of optical brightening agents. The paper normally has watermark Multiple Script CA upright, but the 12c. Selangor is known with inverted watermark.

Watermark varieties include the “St. Edward’s Crown” variety, described in Chapter 3, on the Johore 6c., Perlis 10c., Singapore \$1 and \$2. In practice, this variety should appear on all releases printed on paper produced after the damage occurred to the dandy roll and many more are likely to be found with due diligence.

Perforation:

The comb perforations measure 14.0 on the first supplies of the Singapore issue. Some values were perforated left to right (imperforate left margin and single extension hole at top or bottom, 1c., 4c., 6c. 10c. recorded), while others were perforated up the sheet (imperforate bottom margin and single extension hole at side, 3c. recorded).

To improve ability to tear sheets, comb perforation 17.6 x 18.2 was adopted for all printings from September 1948, at which time the initial order for Singapore was still in production. It would appear from the announced release dates that at least some of the first Singapore order was supplied with the new perforation. This was the finest gauge perforation ever used on a stamp anywhere to date. The perforation direction varies from value to value and printing to printing. The two types are:

Type A:	Top margin imperforate, left and right margins have single extension hole, bottom margin perforated through.	Recorded on: Kedah 20c. BG, Kelantan 6c., 40c., Malacca KG6 3c.-4c., 8c. red, 35c., QE2 1c., 35c., Pahang 5c., Penang QE2 1c., 35c., Perak 1c.-2c., 4c., 6c., 8c. both, 10c., 30c.-40c., Selangor 20c. (1956), Trengganu 2c., 3c., 5c., 6c., 10c.-12c., 20c., 30c., 35c.
Type B:	Bottom margin imperforate, left and right margins have single extension hole, top margin perforated through.	Recorded on: Johore 1c. 5c.-6c., Kedah 1c.-3c., 25c., 40c., Kelantan 1c.-2c., 8c.-10c., Malacca KG6 1c.-2c., 5c.-6c., 8c. green, 12c.-15c., 20c. both, 25c., 40c., 50c., QE2 4c., Negri Sembilan 1c., 3c., 8c. red, Pahang 1c., Penang KG6 1c.-2c., 4c.-6c., 8c. both, 10c.-15c., 20c. BG, 25c., 40c., 50c., QE2 50c., Perak 8c. both, 10c.-20c. BG, 25c., Perlis 1c., Selangor 1c., Trengganu 1c., 4c.-10c., 15c.-\$5,

Remaining values have not been recorded.

It has not been possible to establish a consistent pattern linking direction to printing period. However, it should be noted that some values which only had a single printing, such as the Trengganu 35c., appear with both types, suggesting inconsistent handling of sheets at the point of perforation within De La Rue.⁶

Varieties:

Known varieties (other than the watermark variety described above) include:

State	Value	No.	Position	Variety
Johore	10c.	v1	-	Imperforate. Left margin blocks of four in two shades were reported in 2018, probably proof material.
Kelantan	2c.	v1	R1/2	Stop below “c” of “2c.” at the right reduced to a small mark (sometimes referred to in error as stop omitted). 
Malacca KG6	10c.	v1	?	Dot in right-hand value tablet damaged and appeared as a tick. ⁷
Negri Sembilan	12c.	v1	R10/9	Distorted centre triangle of first “A” of “MALAYA”. ⁸
	15c.	v1	?	Distorted lower right arm to “c” in right-hand value tablet. ⁷
Penang QE2	1c.	v1	R9/10	White flaw in hair on first printing. Retouched on later printings but remained partially visible.

State	Value	No.	Position	Variety
		v2	R2/3	Cigar flaw.
				
Perlis	10c.	v1	not recorded	Left-hand character of Jawi name broken and looks like elongated U. Right-hand end shortened with small dot where it should end. ⁹
	25c.	v1	B1 R7/9	Left leg of "M" in "MALAYA" deformed.
Selangor	4c.	v1	R7/7	A white spot above the top of the oval frame of the portrait, to right of centre, breaking the lines of shading. (Reported constant on "1953 darker shade" printings) ⁷
	5c.	v1	R1/2	Dot between the "L" and the following "A" of "MALAYA". ⁷
	6c.	v1	R8/4	White diagonal cut through right-hand frame lines opposite bottom lines of sky shading. ⁷
	10c.	v1	R3/8	"c" of right-hand value is converted into an "e" by a scratch which continues left and down over "0". (Reported constant on "1952 darker shade printings"). ⁷
		v2	2 R10/9	Top frame line broken, one-third from left (above "A"). (Reported constant on "1952 darker shade" printings) ⁷
	12c.	v1	-	Imperforate
	20c.	v1	R8/2	"LA" of "MALAYA" joined or almost joined by flaw at right of "L". ¹⁰
	\$2	v1	not recorded	Vertical flaw in "L" of "MALAYA" converting it into an open 4. ¹¹

First day facilities:

It should be noted that release dates quoted are, unless otherwise stated, those on which they were released by the Crown Agents in London. Local release dates may have differed according to local stock levels, especially in smaller offices. It is not possible to define local release dates for reprints and old and new printings were mixed before shipment to Malaya.

There were no official first day covers or special postmarks for this issue. Private first day covers were processed as ordinary mail. In the case of the 30c. stamp, which was issued on 4 September 1955, Kelantan and Malacca covers are normally dated 5 September. For more details, see the Requisition history below.

Requisitions and reprinting:

Note: In the table below, plate numbers are shown as SW1 for single working plate 1, B1 for border (duty) plate 1 and V1 for vignette (head) plate 1. Only the numeral appeared in the margins of printed sheets.

1. Reqn. G9/421/1 (1946) Singapore (KG6) (1) (Cancelled).

Initial order: 30,000 sheets of 1c., 200,000 2c., 100,000 3c., 100,000 6c., 120,000 8c., 20,000 10c., 40,000 15c., 30,000 25c., 20,000 30c., 13,000 50c., 6600 \$1, 6450 \$2, 6450 \$5, plus postcards. The Bureau ordered 100 sheets of 1c., 50 2c., 30 3c., 24 6c., 18 8c., 1.8 (later corrected to 18) 10c., 12 15c., 12 25c., 9 30c., 9 50c., 6 \$1, 4.5 \$2, 4.5 \$5. The order was annotated "The Bureau requirements should not be met until adequate supplies of all duties have been dispatched to the Colony. Consult G3 before forwarding Bureau supply."

Notes: This order was **cancelled** and replaced by that below. It is likely that the order was considered excessive at a time of austerity and Singapore was told to think again.

2. Reqn. G9/421/2 (1947) Singapore (KG6) (2).

Initial order for 30,000 sheets of 100 1c., 65,000 2c., 63,000 3c., 62,400 4c., 32,400 6c., 21,800 8c., 121,800 10c., 51,200 15c., 11,200 20c., 31,200 25c., 5900 30c. (cancelled and replaced by 5900 40c.), 20,900 50c., 5600 \$1, 2450 \$2, 2450 \$5, plus revenues, postcards, envelopes and registration envelopes. Specimens were ordered for GPO 385, CA 1, CI 1, CO 2, BM 1, HM 4, DLR 201.

The 1c. and 10c. colour essays were submitted on 15 October 1947 and approved on 20 October. The 2c., 3c., 6c., 8c. and 15c. were submitted on 2 December. All except the 6c. were approved. The 6c. grey was rejected, but was resubmitted in a lighter grey on 11 December and approved on 15 December. The 4c. was submitted on 8 December but had to wait for approval until 22 January 1948. 20c. essays with black frame and green centre, 25c. dark purple and light orange, 40c. red and purple, 50c. black and blue, \$1 blue and purple, \$2 green and red and \$5 green and brown were submitted on 6 February 1948 by rejected on 10 February 1948. The colours of all these values were then reversed (as issued) and resubmitted on 17 February, receiving approval on 18 February.¹²

Plates were released to the printer on 23 April (1c. SW1), 26 April (2c. SW1), 5 May (3c. SW1), 7 May (6c. SW1), 11 May (10c., 15c. SW1), 12 May (8c. SW1), 18 May (\$5 B1), 20 May (50c. B1), 21 May (\$2 B1), 26 May (4c. SW1, 25c. B1), 28 May (\$1 B1). Dates are not recorded for 20c. and 40c., or for the vignette plates (see note below).

Shipping in parcels of 500 sheets took place as follows:

Value	Shipped	Sheets to Malaya.	Sheets to Bureau
1c.:	31 May, 2 September 1948	28,277	10,000
2c.:	31 May, 14 September 1948	58,252	5000
3c.:	11 June, 14 September 1948	58,252	5000
4c.:	11 June, 14 September 1948	59,720	2400
6c.:	5 July, 25 October 1948	31,056	2400
8c.:	5 August, 25 October 1948	19,298	1800
10c.:	9 June, 25 October 1948	115,166	1800
15c.:	25 October 1948	48,590	1200
20c.:	26 July, 2 September 1948	11,470	1200
25c.:	14 July, 14 September 1948	30,685	1200
40c.:	26 July, 2 September 1948	5823	900
50c.:	14 July, 14 September 1948	20,834	900
\$1:	26 July, 14 September 1948	7195	600
\$2:	2 September 1948	3806	450
\$5:	26 July, 14 September 1948	3869	450

Notes: The probability is that vignette plate 2 was used for early printings (except \$2) as it was already at De La Rue for the printing of BMA Requisition 1924/1 (completed 14 July 1948). Vignette plate 2 is confirmed for all bi-colour values.¹³ Vignette plate 3 was issued to De La Rue on 4 August 1948 for contemporary Malacca and Penang work so was available in works at the time of printing of the \$2 and later printings of the other values.

The earliest batch of each value (complete printing in the case of 3c. and 8c.) was perforated 14.0. Later parts of the printing were perforated 17.6 x 18.2 in line with printings for Penang and Malacca. This has been shown to be the case because of the existence of dated copies with the new perforation predating the first reprints of the values concerned, e.g., 40c. is known used 30 April 1951, whereas the first reprint was not shipped by De La Rue until 18 May 1951.

3. Reqn. G9/1289/1 (1947) Penang (KG6) (1).

Initial order for 20,000 sheets of 100 1c., 43,000 2c., 12,400 3c., 12,400 4c., 16,800 6c., 11,800 8c., 41,500 10c., 8700 15c., 8700 20c., 11,200 25c., 8400 40c., 8400 50c., 2600 \$1, 1450 \$2, 1450 \$5, plus revenues, postcards, envelopes and registration envelopes. Specimens were ordered for GPO 385, CA 1, CI 1, CO 1, BM 1, HM 4, DLR 201.

Plates released to printer: 6 July (4c. SW1), 8 July (1c. SW1, 20c. B1), 12 July (6c. SW1), 14 July (10c. SW1), 15 July (8c. SW1), 20 July (15c. SW1), 22 July (3c. SW1), 27 July (\$1 B1), 28 July (50c. B1), 30 July (\$5 B1), 3 August (40c. B1), 4 August (V3), 11 August (\$2 B1), 20 August 1948 (2c. SW1).

The order was shipped as follows:

4. Reqn. G9/1290/1 (1947) Malacca (KG6) (1).

Initial order for 10,000 sheets of 100 of 1c., 13,000 2c., 7400 3c., 7400 4c., 6800 6c., 6800 8c., 21,500 10c., 6200 15c., 3200 20c., 6200 25c., 2900 40c., 2900 50c., 1600 \$1, 1450 \$2, 1450 \$5, plus revenues, postcards, envelopes and registration envelopes. Specimens were ordered for GPO 385, CA 1, CI 1, CO 1, BM 5, HM 4, DLR 201 (1c. to 15c.), 301 (20c.) or 401 (rest).

Pending availability of the new stamps, the Bureau was instructed to supply Malacca with 44,000 1c. BMA, 51,000 2c., 42,000 6c., 47,000 15c., 6200 \$1.

Two duty-blank slip dies based on the Singapore designs were produced, one for single colour duties and one for the border of bi-colour duties. These were used to make up eight single-working dies and seven border dies. 100-set working plates were then produced. The total cost was £810. The dies and plates were stored at De La Rue when not in use.

Postage stamp plates released to printer: 8 September (1c. SW1), 10 September (2c., 4c. SW1), 15 September (6c., 10c., 15c. SW1), 16 September (3c. SW1), 17 September (20c. B1), 20 September (25c., 40c. B1), 21 September (\$1, \$2 B1), 29 September 1948 (50c., \$5 B1). No dates recorded for 8c. or for vignette (see note below).

48. New values and colours (1952):

The next sequence of Requisitions, placed in 1951, introduced for each state new 5c., 12c. (new overseas postcard rate) and 35c. stamps, changed the 8c. from red to green (printed matter rate) and changed the 20c. from black and green to blue (new overseas letter rate). They were released in London and Malaya on 1 September 1952, except in Kelantan. In Kelantan, it was a state public holiday, so the offices did not open until 2 September 1952.

49. Reqn. G9/2598/1 (1951) Singapore (KG6) (7).

Print 10,750 sheets of 5c., 10,750 8c., 30,750 12c., 15,500 20c., 40,500 35c. Specimens were ordered for GPO 369, CA 1, CI 1, CO 2, BM 1, MH 1, HM 4, DLR 201 (5-12c.) or 401 (20c., 35c.). The 8c. green and 20c. blue colour change essays were submitted on 13 July 1951 and approved on 24 July. The new 5c., 12c. and 35c. were submitted on 14 February 1952 and approved on 20 February.¹⁴ Plates released to printer: Dates not recorded. The order was shipped as follows:

20c.:	7 February 1952	2059	500
35c.:	30 May 1952	2550	500

Notes: The Plate Book shows vignette plate 3 in use for this printing. By this date, it was out of use and vignette plate 4 was in use. All examples seen from this printing have been V4.

54. Reqn. G9/5961/1 (1951) Johore (6).

Print 4750 sheets of 5c., 6750 8c., 10,750 12c., 8000 20c., 8000 35c. Specimens were ordered for GPO 369, CA 1, CI 1, CO 2, BM 1, MH 1, HM 4, DLR 201 (5-12c.) or 401 (20c., 35c.). New single-working dies for the 5c. and 12c., plus a new border duty die for the 35c., were produced, from which corresponding 100-set printing plates were made-up

at a cost of £240. The existing plates were used for the 8c., 20c. border and 20c. and 35c. vignette. Plates released to Printer: Dates and numbers not recorded. The order was shipped as follows:

Reprint 20,000 sheets of 6c. Specimens ordered for HM 4, DLR 100. Plates released to printer: 10 September 1953 (6c. SW1). 19,135 sheets shipped to Malaya in two batches 13 and 29 October 1953. Bureau exchanged 477 sheets.

96. Reqn. G9/9067/1 (1953) Malacca (KG6) (6).

Supply from the Bureau by parcel post 540 sheets of 5c., 540 8c., 470 10c. Shipped 30 April 1953.

97. Queen Elizabeth II:

Queen Elizabeth II acceded to the throne on 6 February 1952 on the death of King George VI. New dies with the portrait of Queen Elizabeth II were produced in 1953 for Malacca and Penang, but not Singapore. Orders were placed in the summer of 1953 for all necessary values for both states. This did not put an immediate end to printings of the King George VI stamps as a finite time was needed to design, engrave and approve the new designs and printing did not begin until February 1954. In the meantime, urgent shortages of the 4c. and 5c. stamps in Penang could not be met from Crown Agents Stamp Bureau buffer stocks and had to be met by reprinting in October 1953.

Singapore continued to receive King George VI printings until 1955 as it already had its (much delayed) pictorial 1955 Definitive Issue in preparation.

There is no correlation between printing/shipping dates of the QE2 stamps and the release dates for each value, indicating that priority was given to clearing KG6 and the QE2 stamps were released only when stock levels in post offices were sufficiently low to justify the release of new stocks to offices

98. Reqn. G9/9068/2 (1953) Malacca (QE2) (7).

Print 3500 sheets of 100 1c., 4000 2c., 12,000 4c., 4500 5c., 9000 (later 10,000) 6c., 6500 8c., 31,500 10c., 2500 12c., 3000 20c., 3000 25c., 1750 (2000, 1250) 35c., 2500 50c., 2500 \$1, 700 \$2, 700 \$5, plus postcards, envelopes, registration envelopes. Specimens ordered for HM 4, GPO 382, CA 1, CI 1, CO 3, BM 1, MH 1, PP 44 (1c. only), DLR 100 (1c.-20c.), 200 (25c.-\$5). Plates released to printer: 24 December (1c. SW1), 29 December (2c. 99. Reqn. G9/9068/3 (1953) Malacca (KG6 and QE2) (8).

Supply from the Bureau by letter post 30 sheets of 5c. KG6. Shipped 14 August 1953.

Supply from the Bureau 150 sheets of 35c. QE2. Shipped 27 January 1955.

Notes: The date of shipment of the latter order is remarkably late to be contained in the same requisition, but the timing makes sense when one considers that the main order was only shipped on 14 May 1954. It may have been a late variation order latched onto this Requisition for bureaucratic purposes.

100. Reqn. G9/9069/2 (1953) Penang (QE2) (10).

102. Reqn. G9/9069/4 (1953) Penang (KG6) (12).

Print 4500 sheets of 4c., 2000 5c. Specimens ordered for HM 4, DLR 100. Plates released to printer: 22 October (4c. SW1), 23 October 1953 (5c. SW1). The order was shipped on 30 November 1953 in parcels of 500 as follows:

Value	Sheets to Malaya	Sheets to Bureau	Sheets exchanged by Bureau
4c.:	4564	500	38
5c.:	2045	500	12

Notes: This was an urgent interim reprint for values which were already in short supply in Malaya and for which insufficient Bureau stock remained. They had to be produced without waiting for the new QE2 die to be designed, engraved and approved. This was the only such order.

103. Reqn. G9/9084/1 (1953) Kelantan (7).

Supply from the Bureau 500 sheets of 1c., 2000 2c., 1000 4c., 500 5c., 500 6c., 500 8c., 1000 10c., 500 25c. Shipped 19 March 1953.

25c.:	25 March 1954	5031	314
\$5:	25 March 1954	525	187

Notes: The release of the new Selangor 4c. single working plate 3 to the printer on 12 April 1954 is a mystery as all the 4c. order for Malaya was shipped on 10 February. It may have been used to produce some or all of the 699 sheets supplied to the Bureau or, more likely, only for test purposes.

107. Reqn. G9/216/1 (1953) Kedah (11).

Supply from the Bureau by parcel post 1500 sheets of 4c. Shipped 1 January 1954.

110. Reqn. G9/219/1 (1953) Negri Sembilan (9).

Reprint 4000 sheets of 4c. Specimens ordered for HM 4, DLR 100. Plates released to printer: 26 October 1953 (SW1). 413 sheets shipped to Malaya 15 January 1954 in parcels of 500 sheets. Bureau exchanged 658 sheets.

111. New 30c. value:

Requisitions 659/2-659/12 below were issued in 1954 to cover printing of 30c. stamps. In each case, specimens were supplied to GPO 382, CA 1, CI 1, CO 3, BM 1, MH 1, HM 4, DLR 201. The stamps were shipped to Malaya in parcels of 100 sheets.

Notes: A 30c. stamp was added to the issue to provide an airmail rate. There has been considerable confusion over the issue date of these stamps. They were released in London by the Crown Agents to the trade on Monday 5 September 1955. The local issue date was the day before, Sunday 4 September 1955, and all covers have this date, with two exceptions. Covers from Kelantan have postmarks for 5 September, possibly because there was no postal service on the Sunday. According to a contemporary source²⁰, Malacca GPO did not issue the stamps until late in the afternoon, after the mail had left. GPO covers are usually dated 5 September but covers posted at Asahan are known dated 4 September. However, a GPO cover dated 4 September appeared at Philatex in 2003.

Crown Agents Release Dates:

Published Crown Agents release dates for printings were as shown below For most reprints of Malacca, Penang and Singapore during the reign of King George VI release dates were not recorded in contemporary catalogues, unlike those for the QE2 era and for the Malay states. In addition, contemporary catalogues differ as to the release dates of some values. One release has no corresponding known printing.

Correlation chart of printings, plates, issue dates and reported colours:

In the "Issued" column, "I" indicates a stated release date for a new stamp value/colour, while "CA" indicates an associated Crown Agents release date for a reprint.

In the "Colour" column, my best estimate of the colour according to my classification is shown. However, where it has not been possible for the author to examine a dated copy from that printing and associate it to a specific colour, that colour is shown in *italics*, based on contemporary colour description from reports and/or catalogues. "(f)" indicates a fluorescent colour and "(nf)" a non-fluorescent one.

In the "No." column is shown the author's best judgement as to which stamp listed in this Chapter is likely to correspond to this printing.

Out-of-State Usage:

These stamps were valid for use in any state of the Federation and in Singapore, and were no doubt extensively so used by travellers across state boundaries. However, it is believed that a number of instances occurred when states ran out of stocks of their own stamps and had to borrow from other states. (Such instances are known to have occurred regularly in later issues.)

One confirmed instance with this issue is known. In the first six months of 1951, stocks of BMA stamps were running low but Kelantan had not yet received its new issue. Kelantan therefore borrowed stamps from Perak to

maintain services until its stamps became available on 11 July 1951. 2c., 4c., 6c., 15c.⁴³, 20c.⁴⁴, 25c. and 50c. Perak stamps are known used in Kelantan in this period (recorded dates lie between 9 December 1950 to June 1951 and offices affected include Kota Bharu (Kelantan - there is also one in Perak), Kuala Krai and Pasir Mas).⁴⁵

Whilst it is impossible to tell from a single cover whether it is a traveller's use or an official out-of-state use, there are a number of reported instances of examples where out-of-state use coincided with possible shortages immediately prior to new printings. Kelantan again appears to have run short prior to the release of the 1957 Definitive Issue, resulting in the use of Johore 5c. (recorded 24 March 1957⁴⁶), 10c. Selangor (14 April 1957⁴⁶) and 4c. Perak (18 May 1957⁴⁷). An emergency supply of Kelantan 4c. were shipped by sea from the Crown Agent London Bureau on 17 April, but the other values were not reordered.

Forgeries:

Postal forgeries exist of the Singapore 50c., \$1 and \$2 (and the BMA 50c.) were discovered in 1949 and are believed to have been used on mail from banks in Singapore. They were lithographed on unwatermarked, thick, white wove paper. They were perforated 14 x 14.5 (except the \$1, which was 12). Relative quality of the reproduction suggests that the 50c. was produced first in a BMA version, then adapted to Singapore, then the plate modified to produce the \$1, then the \$2.⁴⁸

Revenue / fiscal use:

This issue was extensively used for fiscal purposes as there were no revenue stamps with values lower than \$25. They were used both for low value transactions and to pay the balance of fees in combination with revenue stamps.

Withdrawal:

The Key Type issues were progressively replaced by pictorial definitives in both Malaya (from 1957) and Singapore (from 1955). The issue was withdrawn after business on the dates shown below:⁴⁹

31 August 1952	3c., 8c. red, 15c., 20c. black and green, 40c. (Replaced by new values).
5 January 1955	Malacca and Penang (KG6) all remaining values (Replaced by QE2).
4 September 1955	Johore, Kedah, Kelantan, Negri Sembilan, Pahang, Perak, Perlis, Selangor, Trengganu 35c. (Redundant value, replaced by 30c.). Singapore (KG6) all remaining values (Replaced by Singapore 1955 Definitive Issue).
4 May 1957	6c., 12c., 25c., 30c. (Replaced by 1957 Federal Definitive Issue).
25 June 1957	Kedah - Trengganu 20c. blue, \$5 (Replaced by 1957 State Definitive Issue).
24 July 1957	Kedah - Trengganu 2c., 50c., \$1 (Replaced by 1957 State Definitive Issue).
3 August 1957	Kedah - Trengganu 10c. (Replaced by 1957 State Definitive Issue).
20 August 1957	Kedah - Trengganu 1c., 4c. 5c., 8c. green, \$2 (Replaced by 1957 State Definitive Issue).
9 June 1960	Johore 1c., 2c., 10c. (Replaced by 1957 State Definitive Issue).
18 August 1960	Johore 4c., 50c. (Replaced by 1957 State Definitive Issue).
6 October 1960	Johore 5c., \$5 (Replaced by 1957 State Definitive Issue).
8 December 1960	Johore 8c. green, 20c. blue, \$1, \$2 (Replaced by 1957 State Definitive Issue).

Late Official use:

Although the King George VI stamps of Penang and Malacca were withdrawn on 5 January 1955, the Government Toddy Shop at Lunas, Kedah, used Penang KG6 stamps to pay the 20c. registration fee on official mail on December 1955 to the Kedah Customs Office at Alor Star.⁵⁰

Invalidation:

At this time, the policy was to render old stamps invalid for postage after a period convenient to the authorities, to enable counter and sorting clerks to check that only valid stamps were used on mail. The issue was invalidated for postage on the dates shown below:

1 January 1958	3c., 8c. red, 15c., 20c. black and green, 40c.
1 July 1959	Perak 35c.
1 December 1960	Malacca and Penang (KG6) - all remaining values (1c., 2c., 4c., 5c., 6c., 8c., 10c., 12c., 20c., 25c., 35c., 50c., \$1, \$2, \$5). ⁵¹
1 August 1961	Johore, Kedah, Kelantan, Negri Sembilan, Pahang, Perak, Perlis, Selangor, Trengganu 35c.; Singapore (KG6) - all remaining values (1c., 2c., 4c., 5c., 6c., 8c., 10c., 12c., 20c., 25c., 35c., 50c., \$1, \$2, \$5).
1 July 1962	Malacca and Penang (QE2) 35c.
1 April 1963	Johore 6c., 12c., 25c., 30c.; Kedah - Trengganu - all remaining values (1c., 2c., 4c., 5c., 6c., 8c., 10c., 12c., 20c., 25c., 30c., 50c., \$1, \$2, \$5).
1 November 1966	Johore - all remaining values (1c., 2c., 4c., 5c., 8c., 10c., 20c., 50c., \$1, \$2, \$5).
